# Modules

IMPAS is a company experienced in the design, manufacturing and supply of a complete range of Oil conditioning modules for various types of sea-going vessels and power plant applications.

## **BOOSTER MODULES / SEPARATOR MODULES**

Systems for the engines:

- MaK / Caterpillar
- Wärtsilä
- MAN B&W

Power range:

- 1,500 till 50,000 kW

Type of engines:

- Main engines
- Auxiliary engines
- Common supply module for all engines

Heating systems of Booster modules:

- Electrical
- Thermal oil
- Steam

Heating systems of Separator modules:

- Electrical
- Thermal oil
- Steam
- Hot water

Design:

- Standard
- Custom made

We provide the following services:

- Design, manufacturing, supply
- Instruction manuals and documentation
- Commissioning
- After sales services

## **OTHER TYPE OF MODULES:**

- Cooling water
- Fuel oil
- Lubricating oil

- 
- Dirty oil
  - Starting air

Systems for the engines:

- MaK / Caterpillar
- Wärtsilä
- MAN B&W

Power range:

- 1,500 till 50,000 kW

Type of engines:

- Main engines
- Auxiliary engines
- Common supply module for all engines

Design:

- Standard
- Custom made

We provide the following services:

- Design, manufacturing, supply
- Instruction manuals and documentation
- Commissioning
- After sales services

The standard as well as the custom built modules have a good price-quality ratio, which is received by:

- specialization in the production of modules;
- using computer controlled machinery;
- buying components in great volume.
